

# CARPET TAPE

## DOUBLE-SIDED SELF-ADHESIVE STRIP

### PRODUCT DESCRIPTION

Double-sided self-adhesive strip

### FIELD OF APPLICATION

Suitable for seamless fixing and later easy removal of carpet.

### PROPERTIES

- Easy to apply
- Hand tearable
- Also bonds to a somewhat rougher surface
- Removable

### PREPARATION

**Working Conditions:** Apply to a substrate that has approximately the same temperature as the tape and its surroundings. For optimum adhesion apply tape at a temperature between +15°C and +25°C. To be processed at a relative humidity of 40-70%.

**Surface Requirements:** The surface must be clean, dry, free of dust and grease.

### APPLICATION

#### Directions for use:

Cut the carpeting to size, put in the correct place and partially fold back, without shifting the carpeting. Cut or tear a strip of Carpet Tape and attach it to the substrate. Then remove protective film, put carpet back on the tape and press/roll firmly (the longer the better). Do not touch the adhesive layer of the tape with your fingers, this reduces the bonding capacity.

**Stains/residue:** Remove tape residue with white spirit.

### STORAGE CONDITIONS

Store in tightly closed container in a dry, cool and frost-free place.

Our advice is based on extensive research and practical experience. However, in view of the large variety of materials and the conditions under which our products are applied, we assume no responsibility for the results obtained and/or any damage caused by the use of the product. Nevertheless, our Service Department is always at your disposal for any advice needed.
